

Keep Their Stories Alive

A gentle way to preserve the ones you love.

AncestorsAI

Remember Grandma's Kitchen?

The way she'd tell stories while kneading bread,
her hands moving with practiced grace? The
wisdom she'd share over tea, the laughter that
crinkled the corners of her eyes? What if those
moments didn't have to fade?

What if your children—and their
children—could still feel the
warmth of her presence?

Your Story, Beautifully Preserved.

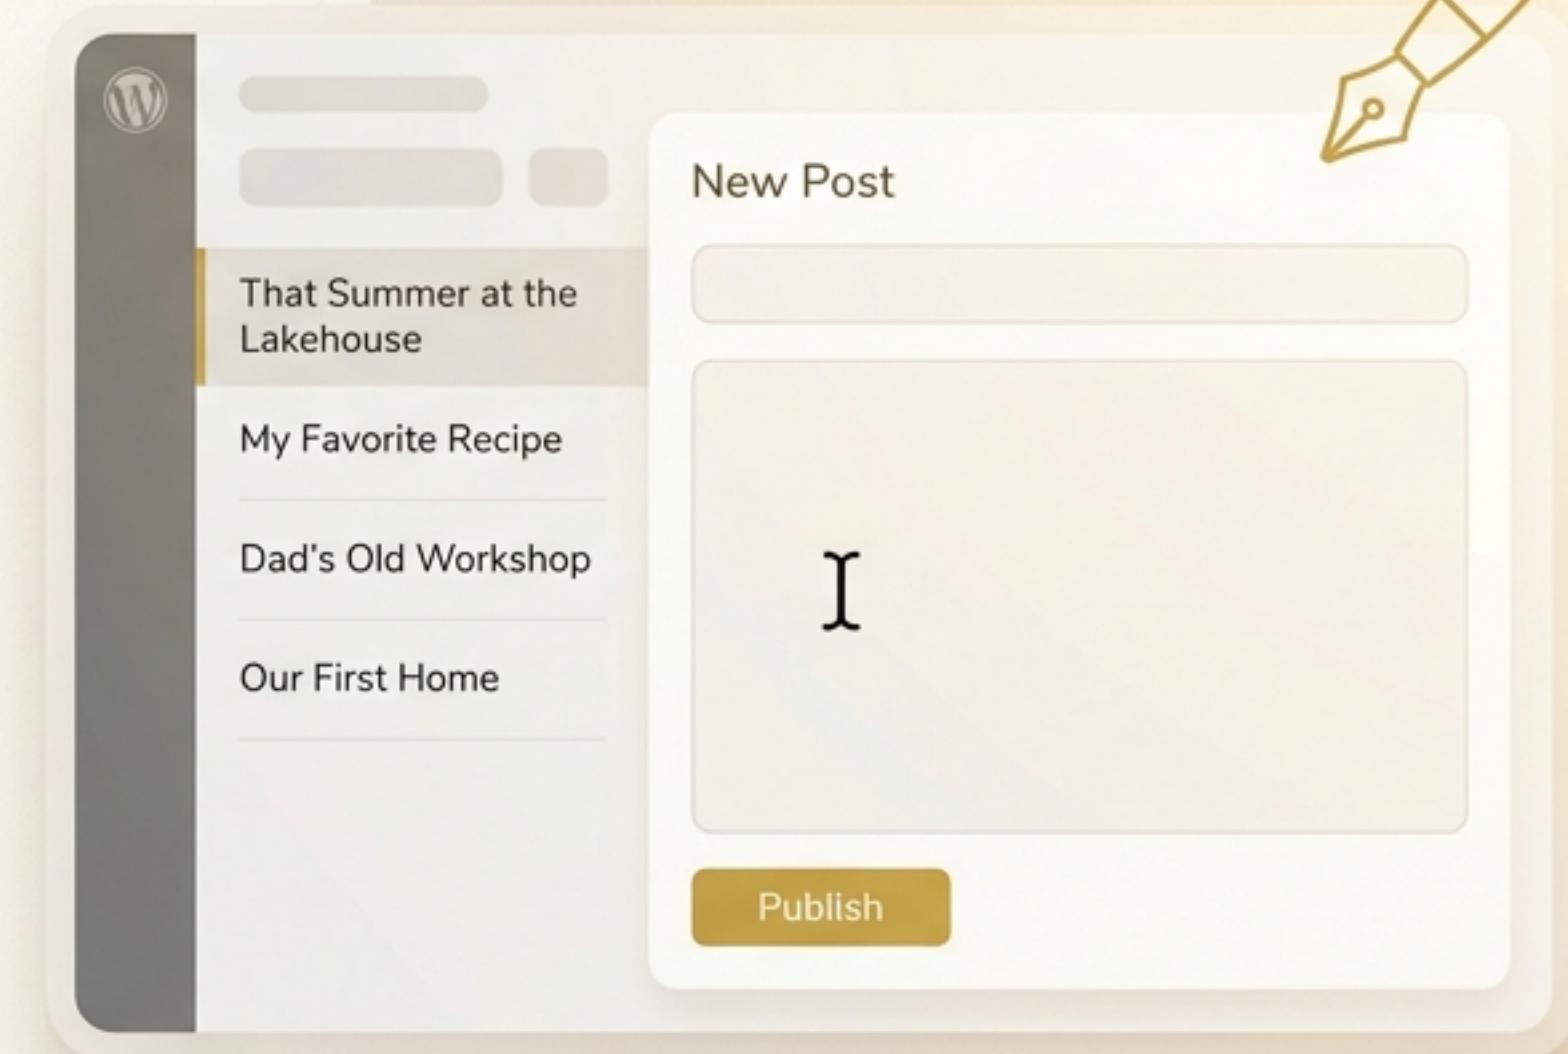

AncestorsAI helps you create something precious: a living memory of the people you love.

It's as simple as it is profound, starting with the stories you're already telling and transforming them into something your family will treasure forever.

It Begins With a Simple Blog.

Think of it as writing letters to the future. Using a comfortable WordPress blog, you share memories just as you would in an email to a friend. A photo from the garden. A story about childhood summers. The recipe that's been passed down for generations.

Nothing complicated.
Nothing technical.

Then Something Magical Happens.

Your stories become a conversation.

Through the gentle assistance of AI, those blog posts transform into an interactive memory keeper—a chatbot that lets your loved ones ask questions, explore memories, and discover the stories they never knew to ask about.

My Favorite Recipe:

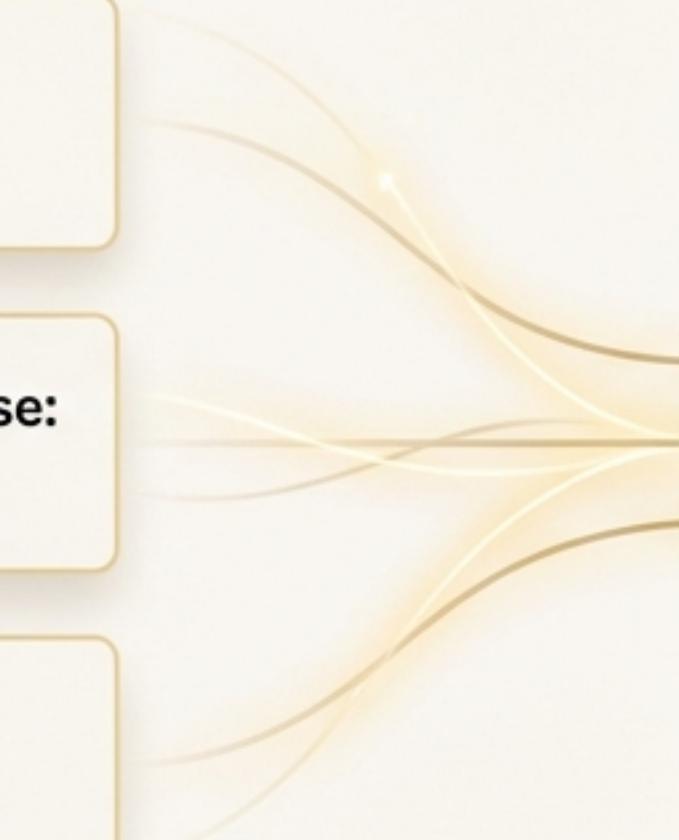

The secret ingredient is...

That Summer at the Lakehouse:

We spent hours on the dock...

Dad's Old Workshop:

The smell of sawdust and oil...

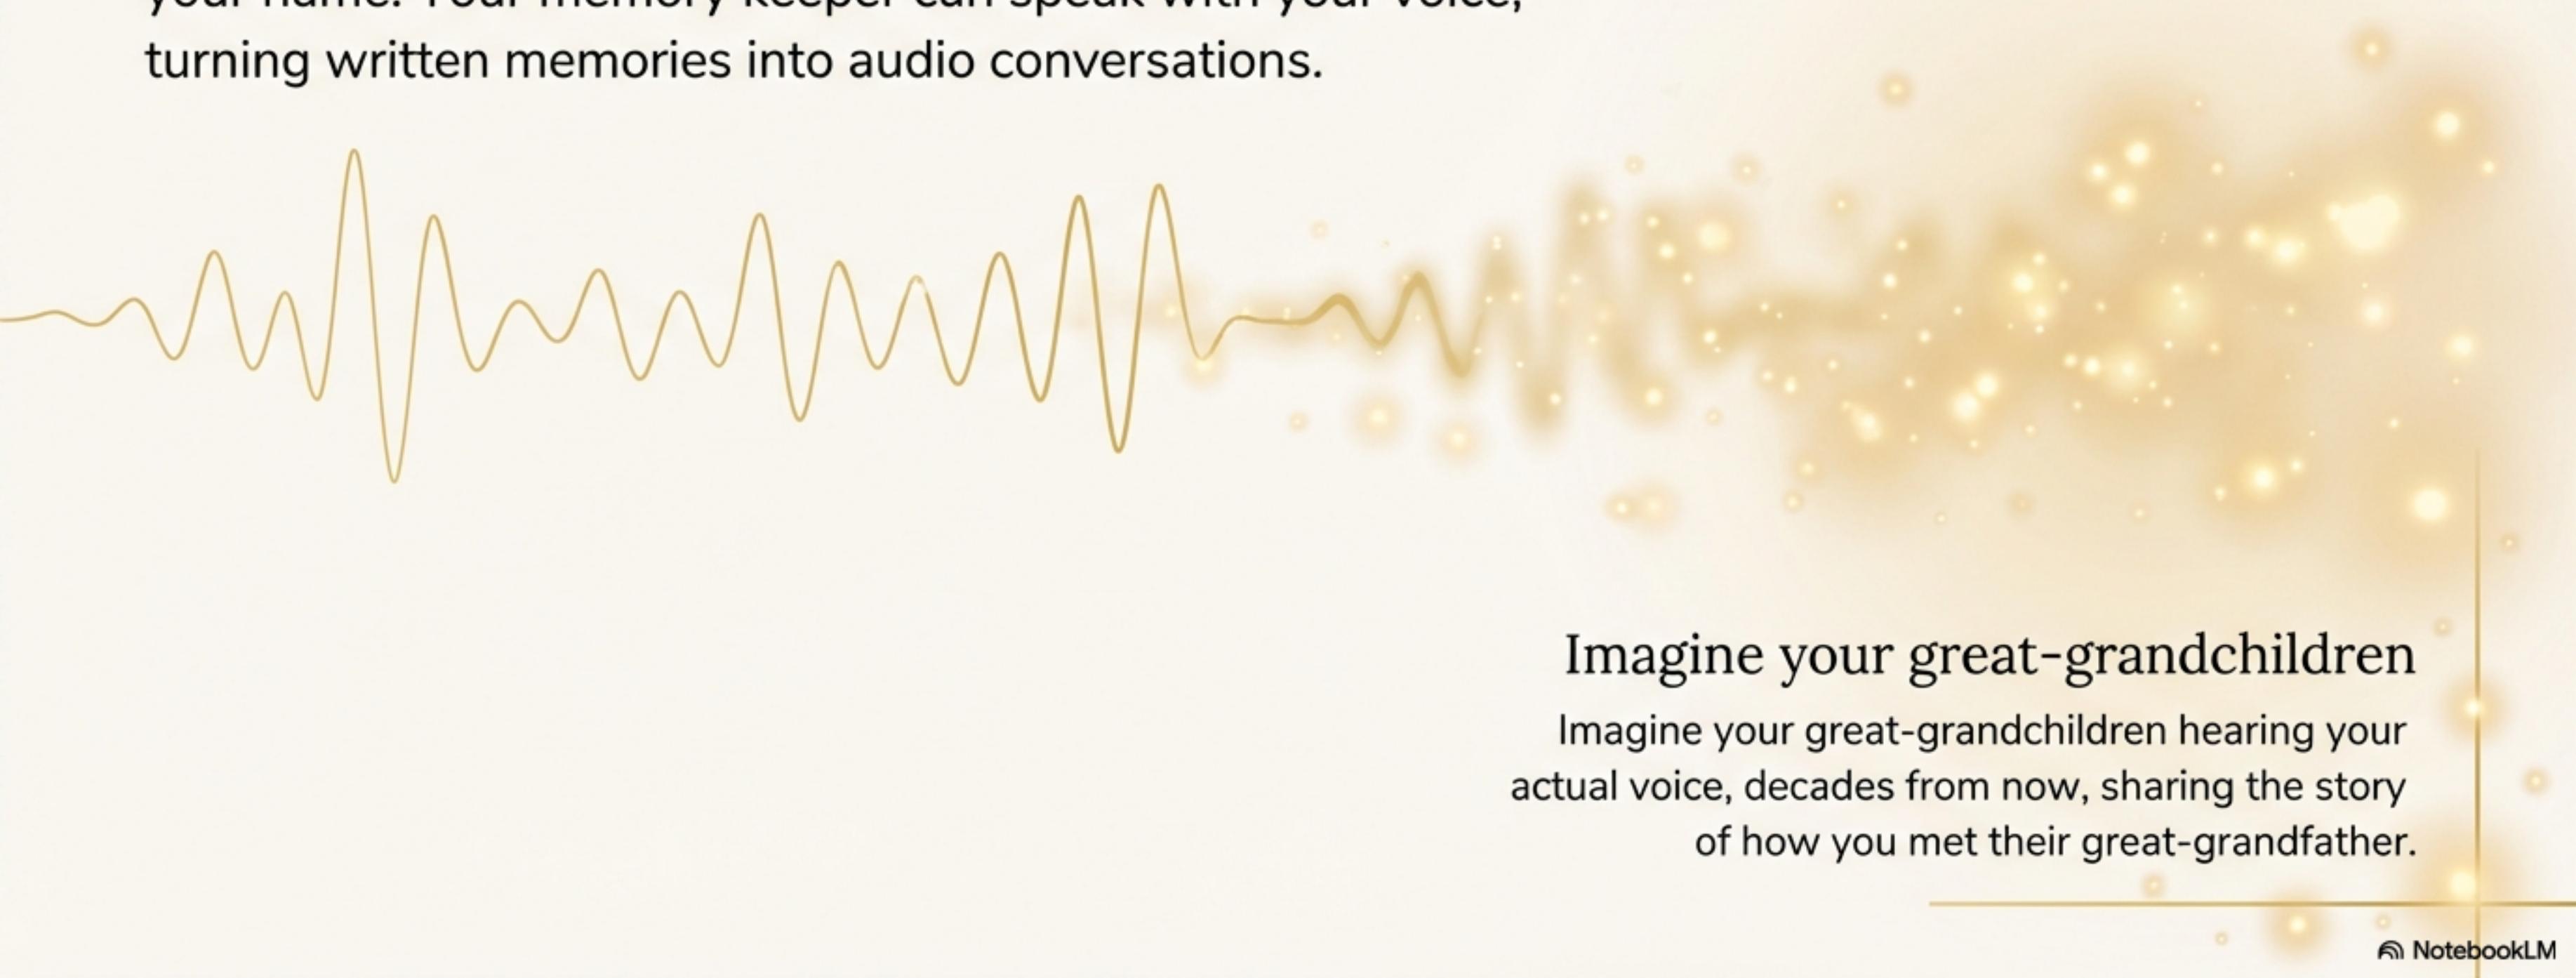

*Grandma, tell me about
when you were young.*

*What was your wedding
day like?*

Hear Their Voice Again

Because love isn't just words on a page—it's the sound of someone's voice, the melody of their laughter, the way they say your name. Your memory keeper can speak with your voice, turning written memories into audio conversations.

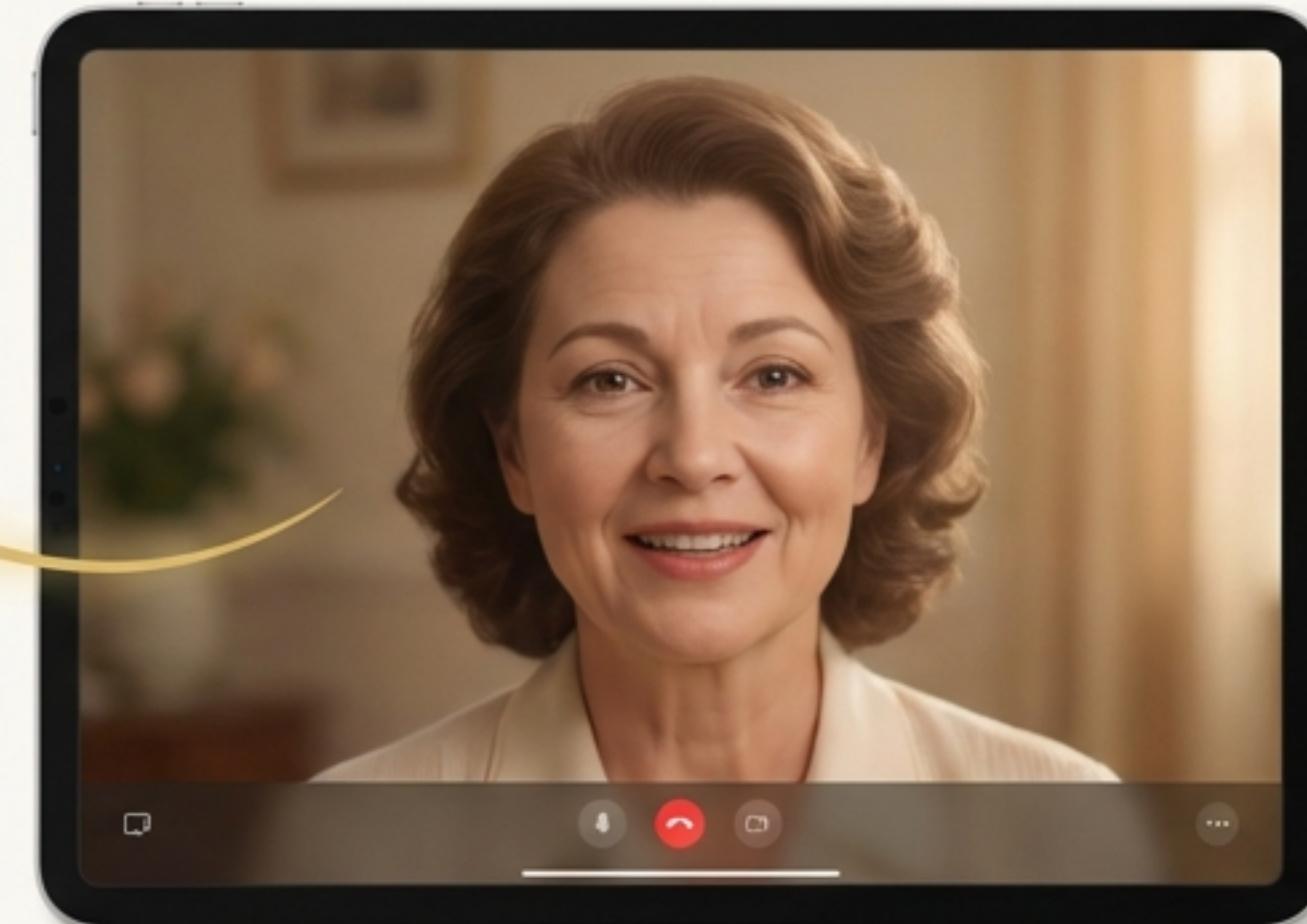

Imagine your great-grandchildren
Imagine your great-grandchildren hearing your actual voice, decades from now, sharing the story of how you met their great-grandfather.

See Their Face, Feel Their Presence.

And then, the most beautiful step of all: video. Your face, your expressions, your presence—all preserved so future generations can not just read about you or hear you, but see you. Have a conversation with you.

Watch your eyes light up as you tell your favorite stories.

It's the closest thing to **sitting across the table** from **someone you love**, even when they're no longer here.

This is AI That Feels Like Love.

We know ‘artificial intelligence’ can sound cold and distant. But that's not what this is. Think of AI as a thoughtful assistant, gently organizing memories and making sure nothing precious is lost. It's like having a devoted archivist for your life.

The technology is sophisticated, but the
the feeling is simple: **connection**.

A Simple, Four-Step Journey

1

Step 1: Share Your Stories

Write blog posts, upload photos, record memories. It's as easy as sending an email.

2

Step 2: Create Your Chat Companion

Your stories become an interactive guide for your family.

3

Step 3: Add Your Voice (optional)

Voice cloning technology recreates the warmth of how you speak.

4

Step 4: Bring Yourself to Life (optional)

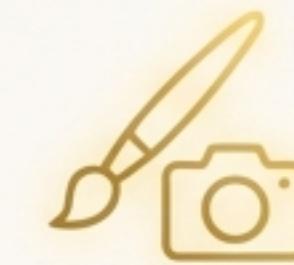

Video brings everything together—your face, voice, and presence.

A Legacy of More Than Memories

A Living Biography

Your life, told your way.

Your Creative Legacy

Art, poetry, photographs, recipes. Create videos or comic books.

Important Facts, Safely Kept

Medical history, family traditions.

Letters to the Future

Write letters delivered at graduations, weddings, or moments they need you most.

Your Wishes and Hopes

Document your heart's desires for those who come after.

Private, Secure, and Entirely Yours.

You Control Everything:
Choose what's private and
what's shared.

You Decide Access: Decide
who has access and when.

Your Digital Home: Your
website, your domain
(like *GrandmaJane.com*),
your rules.

Some memories are for everyone.
Some are just for family. You decide.

A Gift That Keeps Giving

This isn't about technology. It's about **love** extending beyond its natural boundaries.

It's about children **knowing** their great-great-grandparents. It's about **wisdom** that doesn't die.

It's about being there,
even when you can't be.

The Best Time to Preserve Memories is Now.

While they're fresh and vivid.

While the stories can still be told firsthand.

While the people we love can still share
their wisdom in their own words.

Start Preserving Your Legacy

For Your Peace of Mind

Is this difficult to use?

If you can write an email, you can use AncestorsAI. We provide **guided support** every step of the way.

Who owns my stories?

You do. Completely. **Your content, your domain, your control.**

What about privacy?

You control every aspect of who sees what. You control every aspect of who sees what. Nothing is public unless you choose to make it so.

Can I try it first?

Absolutely. Start with the blog and expand to the **interactive features** when you're ready.

Because some
conversations are too
important to end.

AncestorsAI

Your Digital Legacy, Lovingly Preserved.
